Remediation and Report

Accessibility Statement Authoring

Accessibility statements are primarily for users of your content. Usually they will refer to accessibility statements when they encounter problems. Technical and jurisdictional language will likely lead to confusion and increase frustration rather than help your users. It is important to write in simple language and provide useful information to the users, rather than use the language of developers and lawyers.

Accessibility Assessment Report

The Accessibility assessment report, also known as an Audit Report. Assistive Tech tools assess your digital assets for WCAG 2.1/2.2 AA compliance levels and provide automated report to help them meet U.S., Canadian, European, and international regulations for websites, apps, and designs based on four principles (perceivable, operable, understandable, and robust) of accessibility.

Dashboard

Ongoing Web Accessibility Monitoring

Maintaining accessibility is an ongoing process. We work with you through periodic assessments and support to identify any accessibility barriers and fix them. We also ensure that there are no new issues raised..

On-demand Web Accessibility Automated Testing

Running an accessibility test with Assistive Tech tools is the best first step towards greater digital inclusivity.

Automated testing: AI-powered solutions scan and test a website for accessibility nonconformance.

Remediation Tracking

Remediation tracking allows you to track the remediation progress of accessibility issues. Accessibility monitoring provides clear progress about resolved accessibility issues.

Digital Accessibility Evaluation

AccessibilityAssist® monitoring tool is a continuous and proactive process that helps you determine if web content meets accessibility guidelines.

PDF Compliance Monitoring

PDF accessibility plays a pivotal role in providing people with disabilities equal access to information.

Accessibility monitoring is a continuous and proactive process that regularly checks PDFs for violations. It allows developers and content creators to identify and remove accessibility barriers.

Reports for Automated Evaluation

Automated Accessibility Evaluation includes accessibility score, list of remediated violations, and list of violations that require manual actions.

Following Document would be Remediated for Accessibility

Our team of expert auditors performs automated, ADA, WCAG 2.1, 2.2 audit, assistive technology testing, and provide ADA web accessibility audit report which incorporates web accessibility audit and evaluation process, initial evaluation result, failed guidelines, and actions taken to provide remediation.

Training

Online Web accessibility self-service training (Videos) and user accessibility guide

We provide training to your in-house team (content manager, editors, admins, website management team) on website content accessibility best practices to ensure they are self-sufficient. Online custom web accessibility self-service training (videos) and user accessibility guide are created as per individuals' website compliance requirements and platform.

Why Skynet Technologies' Website Accessibility Solution?

- Accessible websites reduce the risk of any ADA related lawsuits.
- We have a team who have the know-how about ADA digital accessibility guidelines, testing tools, methods, and provide rapid website ADA accessibility audit, remediation, and compliance services in quick turnaround.
- Website accessibility is a crucial component of the DEI (Diversity, Equity, and Inclusion) initiative.
- We have experience in providing recommendations for platform-related accessibility gaps.
